Monaco Energy Boat Challenge

July 2026 - September 2026

Engineering Internship: Head of Mechanical

University of Southampton Malaysia

What?

- To design, test mechanical components that meet technical rules.
- To balance reliability with weight to improve efficiency and competitiveness.
- To tightly integrate all components.
- As the head, to coordinate the mechanical department and work with technical director.

How?

- Designed using **Solidworks**, tested with CFD and FEA simulations.
- Made with various manufacturing processes and materials chosen specifically for their properties.
- Pioneered a 20% lighter laser cut and bent aluminium chassis.
- Team meetings and open communication channels to track progress.

Results

- Still in progress.
